## Banknotes Celebrate the 2022 Olympic Winter Games in Beijing

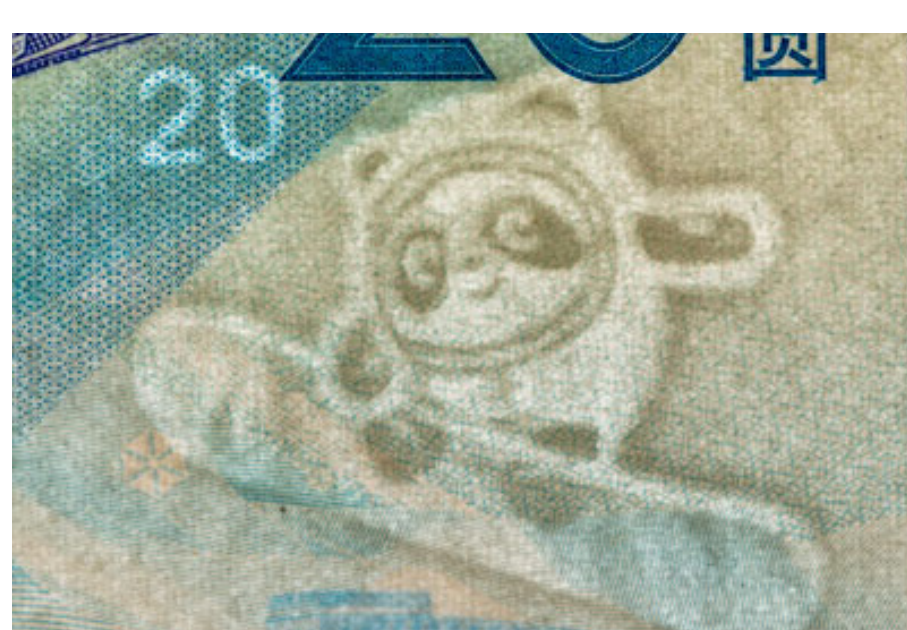

**Kinegram** (in a transparent window)  
An optically variable feature composed of grids that diffract light. This allows various images and effects to be generated, including colour changes (shifts) and 2D as well as 3D images. A Kinegram consists of a high-quality 2D image.

**Spark**  
An optically variable ink that changes colour and brightness, giving the impression of dynamic movement.

**Kinegram**  
An optically variable feature composed of grids that diffract light. This allows various images and effects to be generated, including colour changes (shifts) and 2D as well as 3D images. A Kinegram consists of a high-quality 2D image.

**Spark**  
An optically variable ink that changes colour and brightness, giving the impression of dynamic movement.

**Combination watermark**  
An image and/or text created during the paper production process by varying the density of the paper. The combination watermark consists of a single-tone and multi-tone watermark.

### A word from our banknote expert:

People's Bank of China issued two CNY 20 (yuan) notes on 21 December 2021 to commemorate the 24th Beijing Winter Olympics (held between 4 and 20 February 2022). The notes measure 70mm by 145mm; one has ice sports as its theme and is made of polymer, the other features a skier, is themed to winter sports, and printed on paper. Both notes feature a red commemorative logo on the face (a stylized skier, the text 'BEIJING 2022' as well as the Olympic rings). A total of 200 million sets were made of which 40,000 in a special presentation folder.
